

Takeaways from
Atomic Habits
that can make your
MAANG journey seamless

1. *Habits* are the compound interest of self-improvement

Heard off?

Becoming
1% Better
everyday = **37 Times**
better in
an year

Solving
3
Leetcode
Questions
Everyday

Becomes
1095
Questions
in an year

But **solving nothing** for days = **No progress**

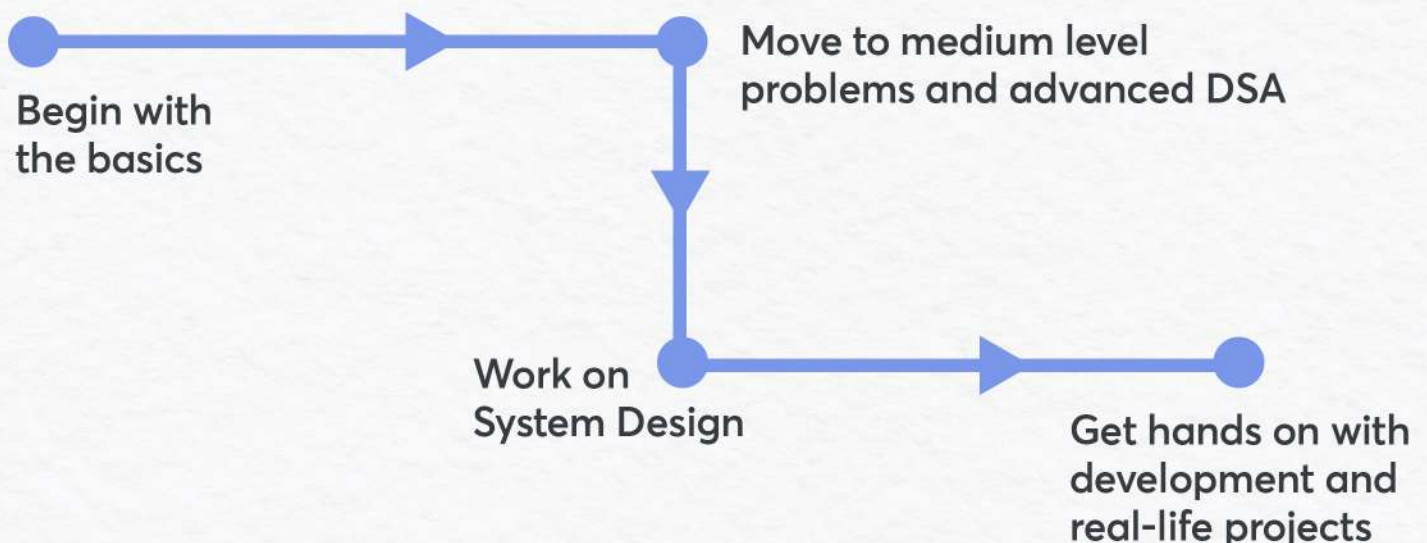

2. *Things* Take Time!

If an infant cannot speak
or walk like an adult?

Then How can you expect such
drastic results from yourself so soon?

***"Success is the product of daily habits
not an overnight transformation,
Start small!"***

For Instance

3. Become *Identity Focussed*

Outcome

Process

Identity

Outcome → "My goal is to get into **MAANG**"

Process → "I solve **3-4 questions daily**"

Identity → "I am a **good software engineer** and will eventually get into **my dream tech company**"

The goal is **NOT** to just solve 100s of questions of DSA or System Design

The goal is to **BECOME** a **good problem solver** & a **great software engineer**.

4. Make your *Habits*

Obvious

Attractive

Easy

Satisfying

Having live classes will make it
Obvious to study consistently

A good motivating peer community
will make learning *Attractive*

Structured Curriculum & Mentorship support
by professionals, will make your journey *Easy*

Getting rewards based on your progress
will make it *Satisfying*
